

GYM MARINE X JORDAN V2 "MARINE GRADE" STAINLESS STEEL DUMBBELLS

Developed in partnership with Jordan Fitness, these stainless steel dumbbells are the product of many hours of research and development behind the scenes. A hybrid version of the popular Ignite V2 design, these weights are encased in Urethane - meaning they are strong and won't mark teak decks and other special floors. The ends are completely customisable - you can add your logo and choose a colour. The logos are laser etched and inked, meaning there are multiple colours available.
