

STAR TRAC 8 SERIES CROSS TRAINER

Elliptical training has become second only to treadmill training in facilities across the globe and it has become one of the most important cardio categories in the eyes of many clients. Finding the right motion, creating user-centric safety features and offering the industry's best entertainment solutions was paramount in our Cross Trainer design. The breakthrough begins with an ingenious rear approach open-step design that gives you the safest possible entry and exit on and off the product. The pedal placement design offers a best in class Q factor for enhanced biomechanics and our Soft Trac[®] pedals ensure maximum comfort throughout the training session. The result is a better, more effective and more efficient workout.
