

TECHNOGYM SKILLROW

This is Technogym's long-awaited first ever rowing machine. As ever, the luxury Italian fitness giant has not disappointed. Whether you're a huge TG fan, or yet to touch a Technogym piece of equipment, there is no denying that this machine is going to be an industry leader.

It has been developed alongside Olympic athletes in order to ensure that it delivers the most efficient athletic experience to the user. What's more, its stabilising technology means that it doesn't move when in use (as do many rowing machines), and also has an easy 2-step fold away feature. So it comes highly recommended by us as it is PERFECT for superyacht gyms!
