

VERSACLIMBER HOME

Versaclimber Home is a zero impact, non traumatic machine, so there's no pounding on knees and joints-it's ideal for people with previous lower body injuries or those who want to avoid high impact exercise such as running. The user motion is smooth and quiet, you can use the VersaClimber while others are reading or watching TV in the same room. A plastic coated cable at the heart of the machine makes for a virtually silent operation.
