

## WATERROWER A1

The [WaterRower](#) A1 Home is handcrafted in premium Ash hardwood with a sleek aluminium monorail. Originally designed for use in commercial fitness studios; the WaterRower A1 Home differs from the rest of the WaterRower range in that it has an aluminium mono-rail supporting the seat. This means that the A1 Home has a slightly smaller in-use footprint than other WaterRowers, however the trade off for this is that the seat action is not as smooth and stable as it is on a dual rail WaterRower. The entry level machine in the WaterRower range, the A1 Home is built to the exacting standards long associated with the WaterRower brand. Each machine is left unstained and has been hand finished in Danish Oil to provide a deep luster and warmth to the wood. For reasons of ecology, all our woods are harvested from replenishable forests.
