

CHARTER RENTALS

Charter Rentals

GYM MARINE

At Gym Marine, we know how challenging it can be to meet the ever-changing needs and expectations of your charter guests during the busy charter season. That's why we developed a scheme enabling us to offer top-of-the-range gym equipment for charter rental, ensuring you can accommodate the requirements of your charter guests – no matter how demanding!

For a more cost-effective approach, we hold stock of specific, popular gym equipment items, that are favoured by charter guests such as Technogym and Peloton. These machines are in a used, but well-maintained, condition that we can supply from our readily available stock

.We can deliver the specified item to the yacht and collect it post-charter – saving a grateful deck crew the headache of finding a place to store it!

However, we understand there are charter guests that may wish to maintain strict training programs from their homes to their holidays, requiring the vessel to accommodate more specific fitness needs. To ensure you can provide the highest level of service, we can supply specified training equipment to your vessel at an increased cost, to be collected post-charter from a Mediterranean port of your choice.

The machines arrived pre-assembled on a pallet and our team of professional engineers can provide remote set up support via video link to make sure the equipment is set up and working, ready in time for your charter! We can also provide crew training if needed.
